enVisionMATH™

Orientation to the Digital Systems

Introduction

This guide covers the enVisionMATH Digital Systems. It explains logging in to Pearson SuccessNet and the organization of the Teacher Center. The guide defines the differences between the Digital System and the Premium Digital System and discusses the features about each.

Log In

Begin by going to PearsonSuccessNet.com. Register for an account if needed.

Type a user name and password and then click **Log In**.

Teacher Center Organization

After logging in, the Teacher Center Home page appears.

My Teacher Resources is on the left. This is where the enVisionMATH program can be found.

In the center of the page is My Classes and Groups.

The Additional Resources and Messages link is on the right.

The main features are organized within the tabs at the top of the page. On the Content tab is the enVisionMATH Table of Contents, Tests, and Search. On the Planning tab, is the Lesson Planner, Assignments, and My Tests, which is where users can build custom tests.

On the Classes tab, create and manage classes. On the Reports tab, view lesson progress and test results for the lessons and tests students complete online.

To learn more about these features, watch the SuccessNet tutorials on this Web site.

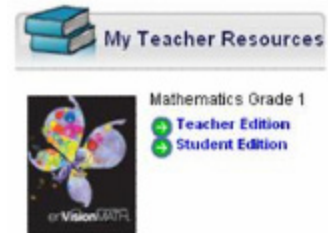

Digital System or Premium Digital System?

What are the differences between the Digital System and the Premium Digital System?

Go back to My Teacher Resources to identify the differences.

Digital System Features

With the Digital System, an image of the student book and links to the Teacher's and Student Editions will be displayed in My Teacher Resources. A Digital System user has access to the Teacher's and Student Editions, Lesson Planner, assignments, tests, and reports.

Premium Digital System Features

With the Premium Digital System, the user has access to the Teacher's and Student Editions, Lesson Planner, assignments, tests, and reports. There is also a link to additional Teacher Resources. Most importantly, there is a black Premium button, which provides access to the interactive lesson content, within My Teacher Resources.

The interactive lesson content includes the Visual Learning Animations, Topic Opener Videos and Interactive Math Stories, interactive Guided Practice, and Lesson Quizzes. Students who have the Premium Digital System can access these activities from their Student Center.

Review

This guide covered how to log in to Pearson SuccessNet. It explained the organization of the Teacher Center and the differences between the Digital System and the Premium Digital System as well as the features of each.

For more information, please watch the other enVisionMATH tutorials on this Web site.
