

Teachers: Assign Content from the Table of Contents

Introduction This guide explains how to assign content from the Table of Contents on SuccessNet Plus.

Assign from the List View

1. Log in to SuccessNet Plus.
2. Select a product, and then click **Pearson Content**.
3. Use the drop-down lists to change what content displays on the right.
4. Click the plus sign or the folder to display the folder's content. Depending on the program, each folder typically represents a section of content, such as teacher resources, a unit, chapter, topic, or a lesson.
5. To assign an activity, move the pointer over the title, and click the Options menu.
6. Click **Assign**.

7. Select one or more classes.
8. Choose a due date.
9. Click **Save and Assign**.

The assignment now appears on your students' To Do lists. You can now make another assignment.

Note: If you assign a folder, all contents within the folder, including assessments, will be assigned to students with the same due date. If the folder includes teacher resources, those will not be assigned to students.
