

Teachers: Assign Content across Multiple Classes

Introduction In this guide, you'll learn how to assign content across multiple classes on SuccessNet Plus.

Assign Across Multiple Classes

1. Log in to SuccessNet Plus.
2. Click **Pearson Content** to view the Table of Contents.
3. Change the content displayed by changing the drop-down lists on the left.
4. Click the plus signs to expand and display the folder contents. Depending on the product, each folder typically represents a section of content, such as a unit, chapter, topic, or lesson.
5. Move the pointer over an activity or lesson title.
6. Click the Options menu.
7. Select **Assign**.
8. Choose the classes for the assignment.

9. Select **Advanced Assign**.
10. Click the radio button to select either the same or different due dates for each class.
11. Click the radio button to select either the entire class or to select specific students in each class.
12. Click **Save and Continue**.
13. Select the due date for your first class. Consider restricting content availability for assessments so students do not see the test before a specific date and time.
14. After making selections, click **Save and Continue**.
15. Select students from each class roster if that option was selected.
16. After making selections, click **Save**.

Note: If you assign a folder, all contents within the folder, including assessments, will be assigned to students with the same due date. If the folder includes teacher resources, those will not be assigned to students.
